

What is the DMAIC Improvement Cycle?

Define

This is the thinking stage where you develop your Problem and or Target statements

This is the stage where measurements are identified in order to track progress and targets

Measure

This is the stage where root cause analysis is applied to identify areas for improvement

Analyse

This is the stage where Lean solutions are implemented based on the root cause identified

Improve

Control

This is the stage where once improvements are made, on going review is undertaken to establish sustainability & delivery
